PROGRAM OBJECTIVE:

The objective of the **Héroes Paisanos Program** is to establish preventive policies, strategies and actions for assistance and guidance to ensure that the entry, transit and exit of Mexicans residing abroad is carried out with respect for their rights, the safety of their assets and knowledge of its obligations.

Upon your arrival in Mexico, locate the Paisano Modules, which are attended by “Observers” people from civil society, who will provide you with information on government procedures and services that you can access inside and outside of Mexico. In addition, if during your transit through the country you were victim of any abuse by federal, state and/or municipal public servants, the observers may receive your complaints, which will be channeled to the competent authority for its investigation.

The Paisano observers are people like you, with a vocation for service, and eager to support you on your way through Mexico.

IF YOU WERE BORN IN THE USA AND YOUR MOTHER OR FATHER ARE MEXICANS, YOU ARE ALSO ENTITLED WITH THE MEXICAN NATIONALITY.

Dual Nationality gives you benefits.

When you obtain the Mexican nationality, you do not lose the American nationality, even if you were born abroad Mexico. If you were born in the United States of America (USA), you may obtain the Mexican nationality if you are a descendant of a Mexican national. Visit the nearest Mexican consulate to request your Mexican birth certificate and passport.

Check the consular offices directory here: <https://consulmex.sre.gob.mx/>

If you were born in Mexico and you obtained the US citizenship before March 20, 1998, now you may reclaim your Mexican citizenship. Check the requirements on the website: <https://sre.gob.mx/declaratoria-de-nacionalidad-mexicana-por-nacimiento>

You may also be eligible for the American citizenship without losing your Mexican nationality. If your mother and/or father is an American citizen or if you already lived for at least 5 years as a permanent resident in the United States, you may be eligible for the American citizenship. Check the requirements on the following US government website: <https://www.usa.gov/espanol/naturalizacion#:~:text=Las%20personas%20nacidas%20en%20Estados,a%20trav%C3%A9s%20de%20los%20padres>

Who is entitled to the Mexican nationality?

- People born in Mexico.
- People born abroad, descendants of Mexican nationals.
- People born abroad, descendants of parents who were naturalized as Mexicans before their birth.
- People born on board of a war or commercial Mexican vessels or aircraft.
- People of Mexican nationality who obtained another nationality after March 20, 1998 or who have a "Declaration of Mexican Nationality" by having obtained another nationality before that date.
- Foreigners who obtain a naturalization letter from the Mexican Secretariat of Foreign Affairs (SRE).

IF YOU HAVE NOT YET COMPLETED THE PROCEDURE OF DUAL NATIONALITY FOR YOUR SONS OR DAUGHTERS, YOU CAN DO IT ABROAD OR IN MEXICO.

In the USA: To register a person who was born outside the national territory as a Mexican, and who is a descendant of a Mexican national, visit your closest Mexican consulate. Schedule your appointment by contacting your consulate at the following link: <https://consulmex.sre.gob.mx/>.

The requirements to obtain a Mexican birth certificate are:

- a. The person to be registered must be present, and if it is a minor, he or she must be in

the company of his or her parents or those who are exercising parental authority (they must present power of attorney with a single clause or sentence of the judge).

- b. Proof of Mexican nationality of the mother, father or both, such as a birth certificate, naturalization letter, declaration of Mexican nationality, valid Mexican passport or a consular registration (matricula consular). This requirement only applies if the person to be registered was not born in Mexico.
- c. Certified copy of the local birth certificate of the person to be registered, if he or she was born abroad. If the document is in a language other than Spanish or English, it must be translated into Spanish, but it does not need to be apostilled, unless it has been issued in a country other than where the consular office is located. In that case, it must be legalized or apostilled, as the case may be.
- d. Prove the kinship of the parents with the minor to be registered.
- e. Present two people over 18 years of age, who will act as witnesses of the registry (if you are not able to provide them, indicate it to the consular office while making your appointment).
- f. Present valid and signed identifications of everyone involved in the registry.

In Mexico: The procedure to register your sons or daughters as Mexicans is called "*Inscripción de actos del registro civil de los mexicanos realizados en el extranjero*". You may apply at your local Civil registry office. By way of example, visit to Directorate General of the Civil Registry of Mexico City website: <https://cdmx.gob.mx/public/InformacionTramite.xhtml?idTramite=588>, Select the option "*Inscripción de actos del registro civil de los mexicanos realizados en el extranjero de Nacimiento*" to consult the costs and requirements to be covered.

If you decide to register the birth of your children in Mexico instead of a consular office, please note that you must obtain the apostille of the birth certificate with the respective US authority.

This apostille will facilitate the process to register the foreign birth certificate in the Civil Registry in Mexico and give the child the rights and benefits of being a Mexican national. The apostilled certificate must be translated into Spanish, by an expert translator duly authorized by the Civil Registry Office.

In Mexico City:

If you want to get the dual nationality for your sons or daughters, request the "*Inscripción de actos realizados en el extranjero (nacimiento)*" at the Dirección General del Registro Civil located at: Arcos de Belén, Esq. Dr. Andrade, Colonia Doctores, Alcaldía Cuauhtémoc, C.P. 06720, Mexico City.

For more information, please contact us by phone *0311 or 5556581111, or sending an email registrocivilcdmx@consejeria.cdmx.gob.mx, or on twitter: @RCivilCDMX

EDUCATIONAL SERVICES

When you return from the U.S. your children can study in Mexico.

What should I do to enroll them?

Preschool, elementary and middle school

The admission of students to public and private preschool, elementary and middle schools will be immediate and will be done by presenting the following:

- Birth certificate or equivalent document issued abroad: When registering, the name will be registered as indicated in the document presented at the time of admission to basic education institutions.
- Academic document: In order to guarantee at all times access to preschool, elementary and middle education, the student must be placed according to the document that proves the last grade completed and, in case of not presenting the academic document, the student will be placed according to the relevant school control procedure.

All children and adolescents have the right to attend school, regardless of their immigration status.

If you have any questions, you can contact the authorities responsible for school control mentioned in the school control directory, which can be found on the website:

https://dgair.sep.gob.mx/dir_pps

<https://dgair.sep.gob.mx/ce/directorios>

High School Education

For admission to the first cycle of baccalaureate in public schools and educational services, the applicant must undergo the diagnostic evaluation or selection process determined by the educational authority, in addition to complying with the requirements set forth therein.

For admission to private schools and educational services with Recognition of Official Validity of Studies (RVOE), Incorporation Agreement or Decree of creation, applicants must comply with the requirements and procedures established by the educational authorities of such institutions.

In the case of those who have already completed partial baccalaureate studies and wish to continue them, access to the educational facilities and services will be in accordance with the availability and without exceeding the authorized enrollment. Interested parties must abide by the criteria and requirements established at the time of admission.

If there is no place available, the educational authority will provide the necessary guidance

regarding those schools and/or educational services that have the capacity for their admission or, if applicable, the school control area(s) to which they can go for support in their location.

In addition, they will have the opportunity to accredit the baccalaureate in the educational options of certification by partial evaluations (non-school mode) or certification by examination, provided they meet the requirements set by the educational or evaluating authority.

University Education

If it is for purely academic purposes, the revalidation of studies will not be required when they intend to start higher education studies, in case of joining a Private Institution of Higher Education with Official Validation of Studies (RVOE) or a public university that is not autonomous.

According to the rules and general criteria to which the revalidation of studies carried out abroad will be adjusted, under agreement 02/04/17, guideline 20.2, it will only allow young people who will begin their higher education studies to do so without the need for the revalidation of studies at the previous level; however, for those who have completed some semesters and will continue their studies in national territory, it will be necessary to have the partial revalidation.

With the exception of normal education, when the interested party, with studies completed and carried out abroad, intends to become an academic or when he/she wishes to begin higher education studies in any official or private institution with recognition of official validity of studies, for exclusively academic purposes, it will not be necessary to revalidate said studies.

In the event that the interested party intends to practice professionally in Mexico, he/she must obtain the revalidation of the academic background and comply with the regulations applicable to such practice.

It must be considered that, in the case of autonomous universities, such institutions have their own conditions regarding the admission process.

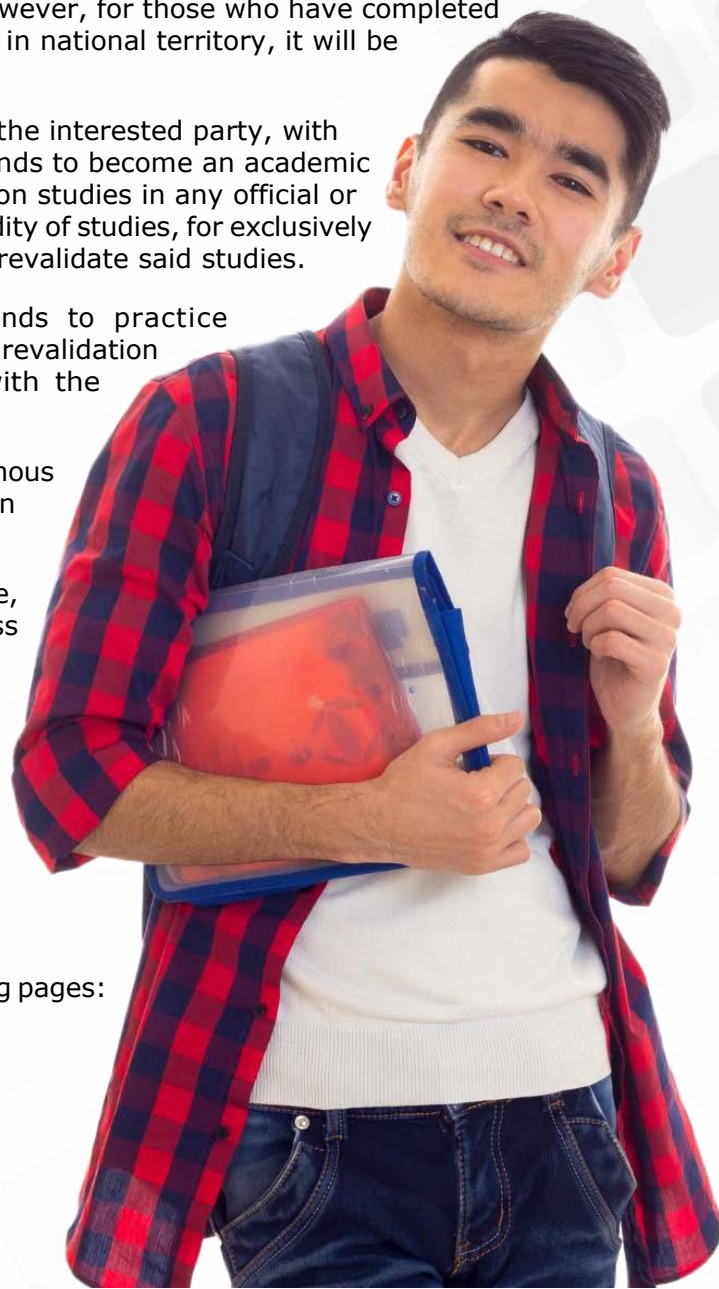

In the event that they require professional practice, this must be done previously through the process of revalidation of studies, for the recognition of these and subsequently obtaining the professional license.

Get to know the FINABIEN cards to send and receive remittances

FINABIEN is a public organization coordinated by the Ministry of Infrastructure, Communications and Transportation (SICT). As of October 21, 2022, by decree published in the Official Gazette of the Federation, the name of Telecommunications of Mexico changed to Financial for Wellbeing, and assumed new tasks, including promoting the sending and receiving of remittances through of FINABIEN Mexico and United States cards.

At Financiera para el Bienestar we work to provide a decent and quality service to people in Mexico who receive their money from outside the country to our branches, since we know that this remittance represents the work, effort, support and commitment of many Mexican families.

Let us remember that on May 1, 2023, at the morning conference of President Andrés Manuel López Obrador, the FINABIEN Mexico and United States cards were presented, which are available in both countries.

In Mexico you can request it online for free through the page www.gob.mx/finabien or in

person at the FINABIEN branches <https://finabien.gob.mx/gobmx/sgst/>

In the United States you can go to any of the 53 consulates of Mexico, or request it electronically by going to www.gob.mx/finabien, clicking on "Request your Financial Card for Wellbeing" and following the instructions. You will only need to have on hand an email, cell phone and an official identification such as: INE, valid passport, consular registration and/or driver's license. Follow the instructions so that your registration is successful and start using your FINABIEN card with VISA support. Once the process is completed correctly, in a matter of days you will receive the card at the registered address.

To activate the card you can download the Financiera para el Bienestar application, available either on Android, through Google Play or through the App Store.

Remember to download the Financial for Wellbeing application, from there you can send and receive remittances, interbank transfers and much more. Plus, you can save through the virtual vault and earn up to 10 percent annual returns.

What is the FINABIEN card for – United States?

The Financiera para el Bienestar card in the United States is used for people who reside in that country to send remittances directly by this means. With which you will only pay \$3.99.

We give you 5 reasons to have your FINABIEN USA card

1. The Finabien USA account will increase to a limit of 20 thousand dollars, and will be ideal for our compatriots to receive their payroll.
2. Online purchases will be 5 thousand dollars per day, double the current limit.
3. The cost of sending remittances will remain at \$3.99. Which allows Mexican families to save up to 82% on the cost of sending money.
4. ATM withdrawals in the United States will also grow to 1 thousand dollars a day.
5. The protection of the Federal Deposit Insurance Corporation (FDIC) will be 250 thousand dollars.

How do I add money to my card in the United States?

Deposits can be made in more than 100,000 businesses such as self-service chains, convenience stores, pharmacies and other places where bank deposits are made. You can also do it through interbank transfers.

How do I add money to my card in Mexico?

Deposits can be made at FINABIEN branches and in more than 20 thousand businesses.

This tool allows you to reduce the cost of remittances and the waiting time for their shipment. It is a great advance for our compatriots because with the card a digital bank account in dollars is opened, which contributes to reducing marginalization and banking exclusion.

The FINABIEN cards and the mobile application are Financiera para el Bienestar products, developed by the Federal Government to fulfill the commitment to make sending remittances cheaper and easier, as well as promote financial inclusion among Mexicans inside and outside the country.

What can you do at the FINABIEN branches in Mexico?

What is human trafficking?

Human trafficking is a crime in which the rights and dignity of its victims are annulled by being considered an "object" that can be traded.

It is an illegal activity whose purpose is to attract a person through deception, violence or promises to exploit them.

Exploitation can occur in different areas such as sexual, forced labor and services, begging, servile marriages, among others.

Approximately 80% of the victims identified worldwide are women and girls, so human trafficking and the different types of exploitation cannot be explained, if not in terms of gender inequality; discrimination and violence violate the access, exercise and respect of the rights of women and girls.

Human trafficking is a crime.

- **What does trafficking in persons mean?**

With the signing of the Protocol to Prevent, Suppress and Punish Trafficking in Persons,

especially Women and Children (Palermo Protocol, 2000), which complements the United Nations Convention against Transnational Organized Crime, an internationally agreed definition of “trafficking in persons”, which includes different types of exploitation and any person is considered a susceptible victim (woman, man, girl, boy or adolescent).

Article 3 of the Protocol to Prevent, Suppress and Punish Trafficking in Persons indicates the definition of trafficking in persons, which for didactic purposes, is divided into three parts (conduct, means and ends):

Behaviors: Recruitment, transportation, transfer, shelter or reception...

Means: threat or use of force or other forms of coercion, kidnapping, fraud, deceit, abuse of power or a situation of vulnerability or the giving or receiving of payments or benefits to obtain the consent of a person who have authority over another...

Purposes: ... for exploitation purposes. This exploitation will include, as a minimum, the exploitation of the prostitution of others or other forms of sexual exploitation, forced labor or services, slavery or practices similar to slavery, servitude or the removal of organs.

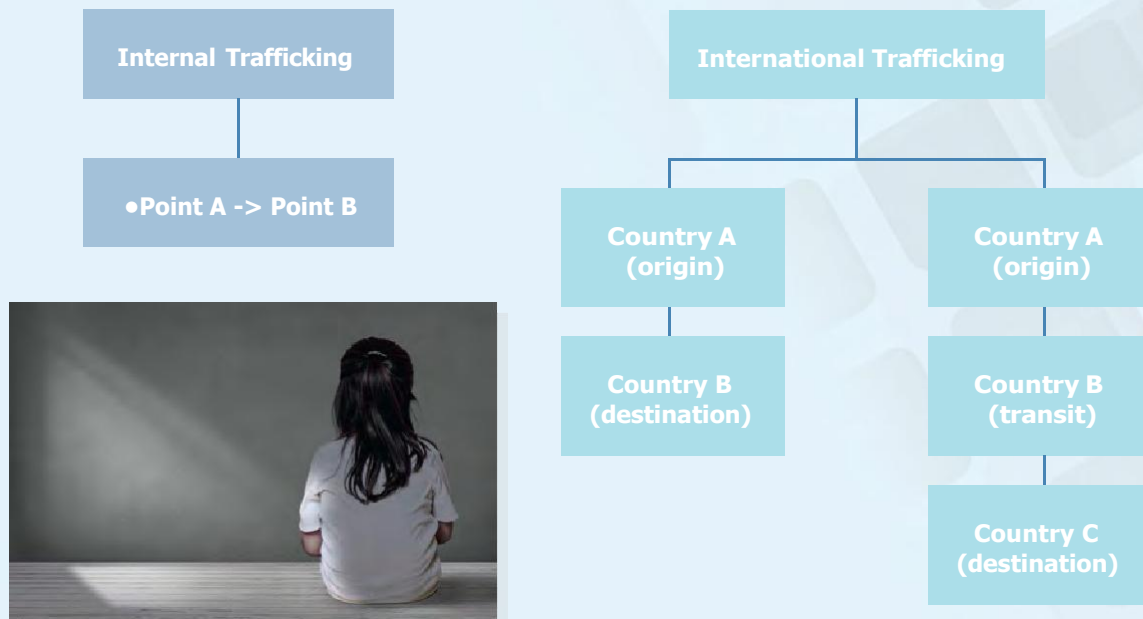

The consent of the victim will not be taken into account when any of the means has been used.

It is important to highlight that when the victim is a girl, boy or adolescent, it will not be necessary for any of the means to have been used, for her to be considered / or as a victim of human trafficking.

● **Internal and international trafficking**

Although trafficking in persons is defined in the context of a supplementary protocol to the United Nations Convention against Transnational Organized Crime, it can also occur in a national context.

When the entire process takes place in a single country, it is known as internal trafficking. While when there is a border crossing, it is international trafficking.

● Trafficking in persons and smuggling of migrants

The term human trafficking is often confused with smuggling. Much of this confusion is due to the fact that most of the texts that started to be developed on human trafficking were written in English, so when the literal translation into Spanish "traffic" was made, both terms were mixed.

Both human trafficking and the smuggling of migrants refer to two different problems, so it is important to use the terms correctly.

Human trafficking	Migrant smuggling
"Training, transportation, transfer, shelter or receipt of a person [...] for their exploitation." <i>Protocol to Prevent, Suppress and Punish Trafficking in Persons</i>	"The facilitation of border crossing without meeting the legal or administrative requirements in order to directly or indirectly obtain a benefit or other of a material nature." <i>Protocol Against the Smuggling of Migrants by Land, Sea and Air</i>

● Types of exploitation

The purpose of human trafficking is the exploitation of its victims. The Protocol to Prevent, Suppress and Punish Trafficking in Persons, especially Women and Children, indicates different types of exploitation:

- prostitution or other forms of sexual exploitation,
- forced labor or services,
- slavery or practices similar to slavery,
- the easement or
- trade in organs.

The different types of exploitation (with the exception of “prostitution or other forms of sexual exploitation” and “organ trafficking”) are defined in other international instruments.

Additionally, it is highlighted that in the definition of human trafficking, the Palermo Protocol mentions the words “as a minimum” when it states the different types of exploitation: “This exploitation will include, as a minimum, the exploitation...”.

The inclusion of this phrase was made for two reasons; the first, so that the Protocol would cover future forms of exploitation and the second, to allow the States Parties to broaden the crimes listed in this definition when penalizing.

Such is the case of Mexico, which in its General Law to Prevent, Punish and Eradicate Crimes in the Matter of Human Trafficking and for the Protection and Assistance to the Victims of these Crimes establishes the following types of exploitation:

- slavery,
- the prostitution of others or other forms of sexual exploitation,
- labor exploitation,
- forced labor or services,
- forced begging,
- the use of persons under the age of eighteen in criminal activities,
- the illegal adoption of a person under eighteen years of age,
- forced or servile marriage,
- trafficking in organs, tissues and cells of living human beings,
- illicit biomedical experimentation on humans

For the investigation and prosecution of federal crimes related to acts of violence against women and human trafficking, you can go to the Special Prosecutor’s Office for Crimes of Violence Against Women and Human Trafficking (FEVIMTRA) of the Attorney General’s Office:
